

N321 Adult Health I

Clinical Reflection Form

Name: Wolpert, Kayla
Date: 7-14-21

End of clinical Journal

1. Briefly write about your experience(s)

I really enjoyed the clinical rotations. I really liked surgery and the ER rotation. I wish I could have done more to participate at the Cancer Center. Professor Lawson was a wonderful clinical instructor to have.

2. What are things you learned?

I was able to start IV's, urinary catheter and even remove one, I was able to pass medications. See what the nurses do in the OR.

3. What are things you would do differently?

I would really like to be able to do more rotations in the places that we enjoyed. I wish I would have had a better knowledge of medications to be able to explain why that patient it takes a certain medication.

4. What is your major "take home" from clinical experience(s)?

My major take home would be to try and not let certain experiences or situations bother me. I had a bad case in the ER with an infant and it hit home really hard since I have a daughter about the same age as the one that was in the ER being seen.

5. Is there anything else you would like to mention?

Overall, I would not have any negative comments. I think this was a wonderful rotation.
