

N431 Adult Health II

Clinical Reflection Form

Name: McKayla Norton

Date: 10/6/21

Clinical Rotation Site: CT8B

1. Briefly write about today's experience(s)

I had a really good experience today on 8B. I feel like the more I am doing things the more comfortable and more confident I am getting. The nurse was really informative and did not make me feel like I was a burden, which happens almost 99% of the time during clinicals. I got to give a bunch of medications, and I didn't feel as hesitant to do so, like I usually am.

2. What is one thing you learned?

One thing I learned today was how to set up an IV pump. We've gone over it during lab, but it wasn't enough to make the concept stick.

3. What is one thing you would do differently?

I don't think there was anything I would do differently. I think in future clinicals, I would like to become more comfortable taking care of more than one patient to get a better feel for actually being a nurse on my own.

4. What is your major "take home" from today's clinical experience(s)?

Major takeaway from clinicals today would be that it is important to have a general understanding of the medications and what they do because odds are your patient is going to ask questions about them.

5. Is there anything else you would like to mention?

I do not have anything else to add about this clinical day.
