

N431 Adult Health II

Clinical Reflection Form

Name: Alexis Cribbett

Date: 11/18/2021

Clinical Rotation Site: Carle Tower 8 B

**1. Briefly write about today's experience(s)**

Today I took care of a male patient who came in for osteomyelitis. We were unable to administer any medications due to them all being P.O. and the client being NPO. We assessed the patient, specifically his leg & sacral wounds and performed dressing changes. I also offered and performed oral care for the patient.

**2. What is one thing you learned?**

Learned how to pack a wound using a wet to dry dressing

**3. What is one thing you would do differently?**

One thing I would do differently next time is actually participating in packing the wound, instead of just shadowing the nurse.

**4. What is your major "take home" from today's clinical experience(s)?**

Turn team is very important and critical for preventing pressure ulcers and deep tissue wounds.

**5. Is there anything else you would like to mention? -- N/A**
