

Module Report

Simulation: Nurse's Touch: The Leader

Module: Case 5: Interprofessional Team Leadership

Individual Name: Happy Kalavadia

Institution: Lakeview CON

Program Type: BSN

Time Use and Score			
	Date/Time	Time	Score
Case 5: Interprofessional Team Leadership	1/16/2022 2:28:17 PM	5 min	100%

Results by Stage		
Stage 1 (3 of 3 Correct)		
Question 1		
Selected Option/ Result	Integrative	Result: Correct
Rationale	When using integrative decision making, the team members will analyze a large amount of data and select several options.	
Question 2		
Selected Option/ Result	"Decentralized decision making promotes job satisfaction among staff nurses."	Result: Correct
Rationale	Staff nurses make decisions about nursing care when an organization uses a decentralized decision-making process. This allows nurses to participate in decision making, which promotes job satisfaction.	
Question 3		
Selected Option/ Result	"Case managers use clinical pathways to monitor a client's progress."	Result: Correct
Rationale	The clinical pathway is a multidisciplinary tool the case manager can use to monitor a client's progress.	
Stage 2 (2 of 2 Correct)		
Question 1		

Selected Option/ Result	Nurses use clinical pathways to help decrease the length of stay.	Result: Correct
Rationale	Clinical pathways provide a planned course of treatment and outcomes for clients with a specific diagnosis. Clinical pathways promote efficient, quality care and reduce the length of stay, which in turn reduces the cost of care.	
Question 2		
Selected Option/ Result	Provide the team with factual information.	Result: Correct
Rationale	When the case manager provides evidence-based factual information to support the change, she is using the rational-empirical strategy.	
Stage 3 (4 of 4 Correct)		
Question 1		
Selected Option/ Result	"The nurse should begin weaning the client from oxygen to room air postoperative day 2."	Result: Correct
Rationale	According to the current clinical pathway, the nurse should begin weaning the client from oxygen to room air postoperative Day 1. This statement indicates a need for further teaching.	
Question 2		
Selected Option/ Result	Storming	Result: Correct
Rationale	In the storming stage, the members of the group begin to disagree with each other and express polarizing views.	
Question 3		
Selected Option/ Result	Open questioning	Result: Correct
Rationale	When the nurse uses open questioning as an active listening technique, she asks questions that begin with what, how, or when in order to obtain more information about the situation.	
Question 4		
Selected Option/ Result	Margaret: "I want to hear what each of you has to say. Can we make sure that everyone has a chance to speak? Bailey, you go first."	Result: Correct
Rationale	A gatekeeper encourages active and open participation and communication by all group members.	

Stage 4			(1 of 1 Correct)		
Question 1					
Selected Option/ Result		is open to change.		Result: Correct	
Rationale		Individuals from the Generation X group grew up during a time of rapid change; therefore, openness to change is a characteristic of this age group.
