February 5, 2022

DEAR HUMAN RESOURCES,

I am writing to express my desire to begin my nursing career at Carle Foundation Hospital, applying for the Carle Nurse Residency Program. I will be graduating in May 2022 and taking the NCLEX in June 2022. Through nursing school, I have become familiar with crucial nursing skills, medical technology, compassionate care values and had the opportunity to gain clinical practice experience at Carle Foundation Hospital.

I believe that customer service sets the expectation for the quality of care. I have excellent customer service skills and have been in customer service with over ten years of experience, allowing me to actively listen and acknowledge patient concerns. I have worked in hospitality, which has prepared me to work in unpredictable fast-paced environments. I'm flexible, quick to pick up new skills, and eager to learn from others, allowing me to adapt and modify in response to patient care. Through both clinical and nonclinical experiences, I have learned the importance of multi-tasking and time management, which will assist me in being able to make quick decisions and prioritize patient needs.

My nursing education and other experiences helped me build several qualities and skills related to patient care, such as customer service, flexibility, time management, and my passion for nursing, preparing me to impact Carle positively. I would sincerely appreciate the opportunity to be part of the Carle Foundation Hospital team and family. Thank you in advance for your consideration of my application.

Sincerely,
Deborah Hemsouvanh
