

N321 Adult Health I

Mid Term Clinical Reflection Form

Name: Abbie Morman

Date: 3/5/22

Midterm clinical Journal

1. Briefly write about your experience(s)

This clinical rotation has been an overall good experience. I have been able to expand on my skills that have been taught in lecture. I've also been able to ask experienced nurses questions regarding things we are learning.

2. What are things you learned?

I have learned and administered new medications, I have been able to dive more into skills. Everything is making more sense once it is seen in person.

3. What are things you would do differently?

I would be less nervous to do new things, like starting IVs.

4. What is your major "take home" from clinical experience(s)?

Everything that is discussed in class is put in action during clinical, which is the way I learn best. Therefore, administering medications, doing physical assessments, and the overall interactions with patients and their families are my major take home.

5. Is there anything else you would like to mention?  
No, I believe everything was mentioned appropriately.
