<p><u>Evaluation of Teaching Presentation</u></p> <p>Introduction of content Patient put at ease Eye contact Clear speech and organized presentation Environment conducive to learning Family included (if applicable) Accuracy of information Validation of learning status Use of teaching aids Appropriate non-verbal body language</p> <p>*In the event the student is unable to present the teaching plan at the bedside, the student will present the teaching plan to the instructor during post-conference</p>	<p>Missing 2 or more of the following criteria:</p> <ul style="list-style-type: none"> • Introduction of content • Patient put at ease • Eye contact • Clear speech and organized presentation • Environment conducive to learning • Family included (if applicable) • Accuracy of information • Validation of learning status • Use of teaching aids • Appropriate non-verbal body language 	<p>Missing 1 of the following criteria:</p> <ul style="list-style-type: none"> • Introduction of content • Patient put at ease • Eye contact • Clear speech and organized presentation • Environment conducive to learning • Family included (if applicable) • Accuracy of information • Validation of learning status • Use of teaching aids • Appropriate non-verbal body language 	<p>Includes all criteria:</p> <ul style="list-style-type: none"> • Introduction of content • Patient put at ease • Eye contact • Clear speech and organized presentation • Environment conducive to learning • Family included (if applicable) • Accuracy of information • Validation of learning status • Use of teaching aids • Appropriate non-verbal body language 	
TOTAL				/30

Assessment of Client/Family (5 points)	Nursing Diagnosis & Goal of Teaching (5 points)	Interventions (5 points)	Methods/Teaching Tools (2 points)	Evaluation (3 points)
<p>Level of motivation for learning: Intrinsic motivation; Eager to learn</p> <p>Barriers to effective learning: No barriers evident</p> <p>Health beliefs/values: Traditional beliefs/values;</p>	<p>Nursing Diagnosis: Excess fluid volume related to cerebral heart failure as evidenced by shortness of breath.</p> <p>Goal of Teaching: The goal of teaching to the prevent the readmission to the hospital due to heart failure symptoms. The patient will further understand cerebral</p>	<p>Intervention 1: Monitor daily weight using the same scale at the same time with the same amount of clothing (Phelps, 2020).</p> <p>Intervention 2: Restrict fluids to 1.5-2 L per day (Phelps, 2020).</p>	<p>Method 1: Discussion; The nurse discussed what cerebral heart failure is, causes, risk factors, differences in systolic and diastolic heart failure, and management techniques.</p> <p>Method 2: Teach back; The nurse asked the patient to repeat</p>	<p>Discuss how the client/family received the teaching: The patient was receptive to the teaching and participated in the teach back and had appropriate interpretation of the teaching points.</p> <p>Identify strengths/weaknesses of</p>

<p>Use of medicine and health professionals to heal and feel better</p> <p>Psychosocial development: Integrity vs Despair stage of Erickson’s stages of psychosocial development</p> <p>Cognitive development: Formal operational stage of Piaget’s theory of cognitive development</p>	<p>heart failure management.</p>	<p>Intervention 3: Monitor blood pressure and prevent hypertension (Phelps, 2020).</p>	<p>back what they learned from the nurses teaching.</p>	<p>the client or family in receiving teaching: The patient was willing to learn and was eager to follow the interventions set in place. However, this is not the first time she has heard of these management techniques. She has been admitted before due to excess fluid volume.</p> <p>Suggest modifications to improve teaching plan (what would have improved the plan?): I would have looked further into whether the patient has systolic or diastolic heart failure and educated her on the difference between those regarding treatment options. Systolic heart failure is the heart muscle doesn’t contract with enough forces. Diastolic heart failure involves stiff ventricles leading to less blood entering the heart during filling (Capriotti, 2020). The treatment/medication options are different for the two.</p>
