Assessment of Client/Family (5 points)	Nursing Diagnosis & Goal of Teaching (5 points)	Interventions (5 points)	Methods/Teaching Tools (2 points)	Evaluation (3 points)
<p><b>Level of motivation for learning:</b></p> <p>Appropriate for age. Very eager and motivated to learn.</p> <p><b>Barriers to effective learning:</b></p> <p>Patient is noncompliant about using Bipap machine and incorporating heart healthy diet.</p> <p><b>Health beliefs/values:</b></p> <p>Patient stated that she does not like to eat low carb healthy because she is used to eat high carb diet all her life.</p> <p><b>Psychosocial development:</b></p> <p>She is very talented, and she is very social and pleasant to talk to . She loves to make friends with different people, and she is very well mannered and loving in nature.</p>	<p><b>Nursing Diagnosis:</b></p> <p>Imbalanced nutrition related to morbid obesity as evidenced by high BMI of 37 and excess body fat.</p> <p><b>Goal of Teaching:</b></p> <p>The goal is to teach patient to eat low sodium and heart healthy diet. In addition, the goal is to eat fresh fruits and vegetables and less intake of frozen foods.</p>	<p><b>Intervention 1:</b></p> <p>Patient was taught to limit the intake of frozen food because they are high in sodium content. Patient was taught to order from heart healthy menu but she is not being complaint.</p> <p><b>Intervention 2:</b></p> <p>Patient was taught active and passive range of motion exercises and was shown to use calorie count app to keep track of the calories.</p> <p><b>Intervention 3:</b></p> <p>Patient was referred to various weight loss program and was given information about bariatric surgery.</p>	<p><b>Method 1:</b></p> <p>Patient is retired LPN nurse and very knowledgeable . I used various handouts to make her understand about low carb healthy diet and their benefits.</p> <p><b>Method 2:</b></p> <p>Patient was shown YouTube videos about how to change dietary habits and incorporate more fruits and fresh vegetables in diet.</p>	<p><b>Discuss how the client/family received the teaching:</b></p> <p>The patient received both auditory and visual information about controlling portion size and adapting healthy food habits.</p> <p><b>Identify strengths/weaknesses of the client or family in receiving teaching:</b></p> <p>The strength of the client is she listened to every information and teaching very effectively and has further questions to ask.</p> <p>The weakness of the client is noncompliant nature because she thinks that her old food habits did not made her obese but its her genetic and family background made her</p>

<p><b>Cognitive development:</b></p> <p>Appropriate for age. She sometimes forgets names of common objects but after few seconds she remembers it again.</p>				<p>obese.</p> <p><b>Suggest modifications to improve teaching plan (what would have improved the plan?):</b></p> <p>Patient should make an action plan instead of just saying that she is thinking about changing her diet regimen.</p> <p>One thing that I thought that could be improved is not showing her youtube videos because she thinks that the information might not be true since it is not considered evidence-based practice.</p>
