

My group chose the Salvation Army for our legacy project. The Salvation Army was founded in religion and is an organization whose purpose is to better the community and help underserved individuals. The Salvation Army's morals are founded in Christianity and preaching the gospel while supporting community members in need. This organization offers services such as their food pantry, bill assistance, youth programs, church services, disaster relief, rehabilitation, veterans services, help for domestic abuse, and other services to help those in need.

While volunteering at the Salvation Army, I was able to stock the pantry and clean and organize the facility. My group started the day by taking food items from storage areas and stocking the pantry full of food. Stocking the food pantry took up most of our day. When we finished the task of stocking the pantry, we began cleaning and organizing the storage room in the facility. The storage room was full of unorganized decorations and clutter that needed to be removed and rehomed. We made the storage room usable again and put a better organizational system in place. The staff at the Salvation Army were thankful for our efforts and expressed immense gratitude for our volunteerism. It felt great to make a difference in the community.
