

N431 Adult Health II

Clinical Reflection Form

Name: Caite Blakeney

Date: 3/24/22

Clinical Rotation Site:

1. Briefly write about today's experience(s)

Today's clinical was pretty exciting. I witnessed several different procedures and saw how the CCU team works together. It seems very difficult for RNs to juggle multiple critical patients at a time.

2. What is one thing you learned? I learned how to do a pleurx drain and drain fluid from the patient's lungs. They ended up draining an entire liter off of his left lung. I was also able to see a new patient be brought up from the ER, and as soon as the nurses started to put lines in, they called for emergency intubation. I was fortunate to see.

3. What is one thing you would do differently?  
I don't think I would have done anything differently. I utilized my time accordingly and saw as much as possible during my rotation.

4. What is your primary "take-home" from today's clinical experience(s)?

I do love the environment of the CCU. Someday, I would like to take on the challenge of being a CCU nurse.

5. Is there anything else you would like to mention?
