<p>Evaluation of Teaching Presentation</p> <p>Introduction of content</p> <p>Patient put at ease</p> <p>Eye contact</p> <p>Clear speech and organized presentation</p> <p>Environment conducive to learning</p> <p>Family included (if applicable)</p> <p>Accuracy of information</p> <p>Validation of learning status</p> <p>Use of teaching aids</p> <p>Appropriate non-verbal body language</p>	<p>Missing 2 or more of the following criteria:</p> <ul style="list-style-type: none"> • Introduction of content • Patient put at ease • Eye contact • Clear speech and organized presentation • Environment conducive to learning • Family included (if applicable) • Accuracy of information • Validation of learning status • Use of teaching aids • Appropriate non-verbal body language 	<p>Missing 1 of the following criteria:</p> <ul style="list-style-type: none"> • Introduction of content • Patient put at ease • Eye contact • Clear speech and organized presentation • Environment conducive to learning • Family included (if applicable) • Accuracy of information • Validation of learning status • Use of teaching aids • Appropriate non-verbal body language 	<p>Includes all criteria:</p> <ul style="list-style-type: none"> • Introduction of content • Patient put at ease • Eye contact • Clear speech and organized presentation • Environment conducive to learning • Family included (if applicable) • Accuracy of information • Validation of learning status • Use of teaching aids • Appropriate non-verbal body language 	
TOTAL				/30

Assessment of Client/Family (5 points)	Nursing Diagnosis & Goal of Teaching (5 points)	Interventions (5 points)	Methods/Teaching Tools (2 points)	Evaluation (3 points)
<p>Level of motivation for learning: The client states that “they are ready to get out of the hospital.” The client was tired but agreed to participate in the teaching.</p> <p>Barriers to effective learning: The client has dementia and has difficulty in hearing.</p> <p>Health beliefs/values: The client reports they “want to get better so they can leave.”</p> <p>Psychosocial development: Appropriate for age.</p> <p>Cognitive development: Declined due to symptoms of dementia. The client could not remember some of the teachings that were stated during the teaching.</p>	<p>Nursing Diagnosis: Risk for infection related to insufficient knowledge as evidenced by current health status.</p> <p>Goal of Teaching: Client will reduce the risk of infection.</p>	<p>Intervention 1: The client will take all of the prescribed antibiotic (Bono et al., 2021).</p> <p>Intervention 2: The client will wipe front to back when cleaning the perineal area.</p> <p>Intervention 3: The client will increase fluid intake (Khauli et al., 2019).</p>	<p>Method 1: The client received patient education instruction of how to prevent at urinary tract infection.</p> <p>Method 2: The client received verbal communication of how a urinary tract infection is prevented.</p>	<p>Discuss how the client/family received the teaching: The client received the information well as they were able to teach back what was taught to them.</p> <p>Identify strengths/weaknesses of the client or family in receiving teaching: The client was interested in the teaching but would close eyes for an extended period and had a challenging time hearing the information. Information was repeated multiple times when the client did not understand what was stated. Valuable information was highlighted in the patient education instructions so the client could find the information.</p> <p>Suggest modifications to improve teaching plan (what would have improved the plan?): Teaching the client right after they ate or before so the client would be more</p>
