

N321 Adult Health I

Final Clinical Reflection Form

Name: Marianna Craighead

Date: 4/21/22

Final clinical Journal

1. Briefly write about your experience(s)

I enjoyed my instructor for clinical she brought me a lot of knowledge about things I did not know. My favorite part of clinical was going down to the ED.

2. What are things you learned?

I learned that many different conditions end up on the Med-Surg floor. I also learned about the various procedures that can be performed. I thought it exciting to assist with an IV inserted with an ultrasound.

3. What are things you would do differently?

I did not like afternoon clinical. We did not get to do much on the Med-Surg floor. There weren't very many medications to be given. The nurses didn't want us to follow them because they were charting on the computer.

4. What is your primary "take-home" from clinical experience(s)?

That there are various people in the age range to take care of. People are different in how you would interact with those clients. Some people don't want you to take care of them because you're a student, and that is okay.

5. Is there anything else you would like to mention?

No
