

N321 Adult Health I

Final Clinical Reflection Form

Name: Alfonso Crane

Date: 05/2022

Final clinical Journal

1. Briefly write about your experience(s)

My experiences grew with knowledge and skills as the weeks went by. My clinical instructor provided feedback and the necessary tools in order to have a successful and enjoyable clinical experience.

2. What are things you learned?

Passing medications and using the MAR are two things I learned throughout this clinical experience that will benefit me going forward during the rest of my clinical experiences at Lakeview.

3. What are things you would do differently?

I would be more open and ready to ask questions to the nurses.

4. What is your major “take home” from clinical experience(s)?

The major “take home” from my clinical experience is the amount of work and effort a nurse needs to put in for each patient in order to care for them. It is admirable to watch the nurses work so hard and care for each and every client

5. Is there anything else you would like to mention?

I would like to mention that although my clinical experience towards the end of the semester was better, there was miscommunication between the school and nurses at Carle that should have been addressed sooner, rather than have the nursing students face the consequences of this miscommunication. Our clinical instructor, Dr. Backlin, made the best out of our clinical experience
