

Medication Worksheet N321

Name \_\_\_\_\_

(each worth 1 point)

50 mcg = \_\_\_\_\_ mg

1000 mg = \_\_\_\_\_ g

0.03 g = \_\_\_\_\_ mg

1 g = \_\_\_\_\_ mg

1 fl oz = \_\_\_\_\_ mL

1 tbsp = \_\_\_\_\_ mL

1 tsp = \_\_\_\_\_ mL

30 mL = \_\_\_\_\_ fl oz

3 tsp = \_\_\_\_\_ mL

1L= \_\_\_\_\_ mL

(Each problem worth 2 points)

1. The provider orders Digoxin elixir 0.25 mg BID. Using the picture, how many mLs will be given with each dose? (round to whole number if needed)

2. Using the picture above how many teaspoons will you be giving?

3. The provider orders Regular insulin of 56 units. The nurse draws insulin in the syringe. According to the picture is the insulin drawn up correctly?

4. The provider orders Epoetin 8000 units subq on Tuesday, Thursday & Saturday. How much will be drawn using the picture above per dose? (Round to nearest tenth if needed)

5. The provider orders intravenous fluids for 6 hours. The picture above is your bag of fluids to be hung. How many mL/hr will you run this order? (Round to the nearest tenth if needed)

6. The provider Orders the fluids above to run at 50mL/hr.
- How long will bag run in hours
  - If bag started at 0800 what time, will infusion be complete? (Military time)

7. Provider orders Cubicin 500 mg to run in 30 min. Using picture above what mL/hr should be set? (Round to the tenth if needed)

8. The provider orders furosemide 20 mg IV BID. Using the picture how many mL will need to be drawn up per dose?

9. The provider orders ondansetron 4mg TID. How many mg will you give in a 24 hour period?

|                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
