Background

Therapeutic communication is a fundamental component of nursing and is a complex concept. Ensuring positive encounters between nurses and patients is essential for improving the quality of nursing interactions, the performance of various nursing duties, and meeting patients' diverse needs (Abdolrahimi et al., 2017).

This assignment will help students feel comfortable initiating conversations with older adults and raising awareness of older persons' wishes, expectations, resources, cultural traditions, and strengths.

Additional Guidelines:

- Plagiarism will result in a zero on the assignment.
- Follow the directions within each graded section.
- A template for the interview process is provided below.
- No late work will be accepted. Late work will earn a zero.
- All assignments must be completed in Microsoft Word.
- PDF and other formats will not be accepted.

Step One: Interview process:

Step One: Directions: Each student will independently complete the Therapeutic Communication Gerontology Assignment. Students will select an older adult to interview. The interviewee may be a family member, and the interviewee does not have to be a patient. Interviews can be face-to-face, virtual, or by phone. Each interview should be a minimum of 20 minutes. Students should ask a minimum of FIVE question. Example questions are listed below. Students can phrase the questions in a conversational tone. A student may ask a question not listed below but must write down additional questions in interview process chart provided. Students are to complete the Interview Process Chart per chart directions.

Example Interview questions:

1. What are the most rewarding things about getting older? Is it a lifetime of knowledge?
2. What are the most important lessons you have learned in your life? Ask to hear the stories behind those lessons.
3. Who has influenced you the most?
4. What life advice would you pass to future generations?

5. If you could go back to any age, what would it be? Would they stay the age they are now or go back? How far back? What was life like at that time?
6. What do you remember about the place you grew up? Do they still live there, or have they visited? If so, how has it changed?
7. Which invention from your lifetime that amazed you? What was life like before?
8. What was your favorite movie when you were younger?
9. What was your first job? How about your favorite?

Question and Question Number: <ul style="list-style-type: none"> • List the question you asked below 	Student communication: <ul style="list-style-type: none"> • List 1 verbal communication skill used • List 1 non-verbal communication skill used. 	Interview communication: <ul style="list-style-type: none"> • List 1 verbal communication skill the patient used • List 1 non-verbal communication skill the interviewee used 	Student thoughts & feelings related to the communication <ul style="list-style-type: none"> • Describe 1 thought or feeling related to the communication
1 What are the most rewarding things about getting older? Is it a lifetime of knowledge?	<ul style="list-style-type: none"> • I abstained myself from speaking too much so I could actively listen to what she had to say. • Giving my patient space help her think and communicate more efficient. 	<ul style="list-style-type: none"> • The patient emphasized the benefits she thought was the most important. • Eye contact was used to emphasize the most rewarding parts of getting older. 	<ul style="list-style-type: none"> • I felt this question allowed my grandmother to express how blessed she has felt over the years. It allowed me to feel how lucky I am to have a wonderful person in my life to teach me along the way.
2 What are the most important lessons you have learned in your life? Ask to hear	<ul style="list-style-type: none"> • I paraphrased her statement to clarify I understood the answer. • I used my hand 	<ul style="list-style-type: none"> • The patient gave credit to others for the lessons she learned in her life. • The facial 	<ul style="list-style-type: none"> • This question I felt was a teaching moment. I paraphrased her response to make sure I interpreted all parts of the questions correctly. I took in the full response and could learn from what my grandmother had

the stories behind those lessons.	gestures to help explain the question.	expressions my patient made help me place myself in her shoes and be thankful of the lessons she has taught me.	to say.
3 If you could go back to any age, what would it be? Would they stay the age they are now or go back? How far back? What was lifelike at that time?	<ul style="list-style-type: none"> • I used humor to enlighten the question of how she chose to be back in her 20's. • Facial expressions showed a surprise look on my face to the answer. 	<ul style="list-style-type: none"> • The patient paraphrased the question making sure she understood the full question. • The patient expressed happiness upon her face. 	<ul style="list-style-type: none"> • As an interviewer I could have broken the question up into more parts. I felt my grandmother was a little confused about this question. Humor may not have been the verbal communication to use, but I felt it enlighten the mood.
4 What do you remember about the place you grew up? Do they still live there, or have they visited? If so, how has it changed?	<ul style="list-style-type: none"> • I recognized hesitation in my patient's voice and gave her space to answer. • I gave my patient space to give her time to come up with words. 	<ul style="list-style-type: none"> • The patient showed interest in this question the most describing multiple details. • The patient started crying from all of the memories that came running back to her. 	<ul style="list-style-type: none"> • I allowed time so my grandmother could come up with words. This question choked her up a little because of all the wonderful memories in the house they grew up in. I felt my communication allowed my patient to feel comfortable with expressing the emotion to me.
5 What was your first job? How	<ul style="list-style-type: none"> • I recognized the importance of her 	<ul style="list-style-type: none"> • The patient emphasized the 	<ul style="list-style-type: none"> • I allowed my posture to express that I was interested in learning more. I didn't know

about your favorite?	<p>students and how much she loved teaching.</p> <ul style="list-style-type: none"> • I had an open posture that help my patient understand that I was intrigued by her response. 	<p>joys she had during her 34 years of teaching.</p> <ul style="list-style-type: none"> • The body movement of my patient help her express how serious she took her job. 	<p>that my grandmother used to work in a movie theater and taught for 34 years. I feel that my patient was intrigued in this question.</p>
----------------------	--	---	--

Step Two: Interview Evaluation-Reflective Activity

Step Two Directions: After interviewing an older adult, students are to complete a self-reflective evaluation. Answer all FOUR questions listed below. Complete in full sentences with proper clarity and mechanics. Follow rubric for full guidelines.

1. What are the major take-home lessons after interviewing an older adult?

The older populations may have had more responsibility than we do now. I think the younger population doesn't get held to a higher standard anymore, so changes are being made in todays society. Although the older population may have had it more difficult than what we do, they cherished more memories with each other. Today's society is all caught up in technology that no one takes the time to just look around them and enjoy the moment.

2. How can a nurse adapt their practice to be more responsive to the unique needs of an older adult client?

Adapting to the needs of an older adult client can be challenging. Getting to know the patient could improve your ability as a nurse to be more responsive. Communication is the main concept in becoming responsive. Using therapeutic communication can allow you to receive trust in your patient. After receiving the patients trust they will become an open book.

3. In what way is a student building their nursing skills by interviewing patients including older adults?

I think us as nurses can learn from this experience by understanding the older generation more. Some nurses can often diminish the older population and assume they can't do anything. From my perspective I think the older generation are the wisest people we know. Being a better listener during the interview process can help a student learn more about their patient. During the interview process I learned multiple facts that I didn't know before. Not only does interviewing help be a better listener but it can also better your communication. I felt my communication gradually improved throughout the process.

4. Reflect on one question and expand on how the communication could improve.

The question that I could have improved on was asking the stories behind the lessons. I could have been more descriptive on what exactly I was trying to achieve. My grandma is hard of hearing so I could have spoken a little louder for her to hear. Reading the questions little by little also could have helped her fully understand.
