

N321 Adult Health I

Clinical Reflection Form

Name: Jamal Drea

Date:

Mid Term Journal

1. Briefly write about your experience(s)

This semester has been filled with plenty of new experiences. Fundamentals was just about basic care and I feel like this class allows us to apply what we have actually learned in class. I also like the chance to experience other units in our rotations and even though I have only been with the STAT RN, I look forward to the other opportunities.

2. What are things you learned?

I have learned about med administration, IV insertions, G tubes, NG tubes, and have become more confident on assessment skills.

3. What are things you would do differently?

I need more practice with hands on skills, speeding up my assessment, and working on therapeutic communication and having an overall more confident approach to caring for patients.

4. What is your major "take home" from clinical experience(s)?

My major "take home" is the importance of the nursing process and assessment in guiding the care of patients along with our interventions.

5. Is there anything else you would like to mention?

I look to finish off the rest of the semester strong.
