

N431 Adult Health II

Clinical Reflection Form

Name: Abbie Morman

Date: 9/8/22

Clinical Rotation Site:

- Briefly write about today's experience(s)

I went to the dialysis lab. I was able to see multiple patients go through the treatment process. I was able to assess fistulas, take vital signs, and assess for any adverse effects that come along with dialysis.

- What is one thing you learned?

I learned a lot about fistulas and the different kinds of access devices that can be used for treatment. I listened to and felt multiple fistulas along with learning how the actual dialysis machine operates.

- What is one thing you would do differently?

I would ask more questions and try to see the charting process more.

- What is your major "take home" from today's clinical experience(s)?

The major takehome from this clinical experience was understanding the dialysis treatment as an overall process. Along with the major reasons patients have dialysis. I was also able to see and learn about normal responses that come with this therapy.

- Is there anything else you would like to mention?

The nurses in the dialysis lab were very knowledgeable and helpful. They showed me extra things in our downtime, which I found to be very helpful.
