

## N431 Concept Map: Items to Include

- I. Demographic Data**
  - Date of admission
  - Admission Diagnosis/Chief Complaint
  - Age
  - Gender
  - Race/Ethnicity
  - Allergies
  - Code Status
  - Height in cm & Weight in kg
  - Psychosocial & Cognitive Developmental Stage
  - Braden & Morse Fall Score
  - Infection Control Precautions
- II. Medical history**
  - Previous medical history
  - Prior hospitalizations
  - Previous surgical history
  - Social history
- III. Admission history**
  - OLD CARTS
  - What brought the client into the hospital?
  - How were symptoms managed prior to coming to the hospital?
- IV. Pathophysiology of chief complaint or primary medical diagnosis**
  - Disease process is thoroughly discussed from the cellular level, examines how the disease process influences affected body systems
  - Signs/symptoms of disease
  - Diagnosis of disease
  - Treatment of disease
  - **Includes all relevant patient data**
  - **Should be reviewed in Grammarly for clarity/mechanics**
- V. Lab Data/Diagnostic Imaging**
  - All abnormal labs discussed and related to diagnosis or chronic health issues
  - Includes normal lab values for all abnormal labs
  - Diagnostic imaging completed
- VI. Current medications**
  - Pertinent medications are listed with pharmacological and therapeutic classification
  - Why the client is taking the medication
  - Key nursing assessment(s) prior to administration
- VII. Physical Exam/Assessment**
  - Perform a head-to-toe assessment
  - Relate pertinent assessment findings to diagnosis, includes assessment of any body system affected by diagnosis
  - Assessment of vital signs
  - Pain assessment
  - Highlight all abnormal physical exam, pain assessment, and vital sign findings
- VIII. Orders**
  - All active orders for treatment, relate why it is relevant for diagnosis
- IX. Nursing Diagnoses**
  - 3 Nursing diagnoses prioritized appropriately
  - Identify rationale for why this nursing diagnosis was chosen
  - Provide 2 interventions per nursing diagnosis to address deficit
  - Evaluation of interventions
- II. References**
  - 3 scholarly references
  - Less than 5 years old
  - APA format
