

N431 Adult Health II

Clinical Reflection Form

Name: Cory Coffman

Date: 9/14/22

Clinical Rotation Site: OSF ER

1. Briefly write about today's experience(s)
 - Today I was able to work on a handful of IVs. It was nice being able to brush up on practicing them. In the ER I saw a wide range of patients from strokes to amputated toes. The ER is my favorite clinical rotation!

2. What is one thing you learned?
 - I learned how to do placements for a 12 lead EKG. I also got to see the rhythms that printed out for imaging. Proper placement is important for an accurate reading!

3. What is one thing you would do differently?
 - I'm not sure I would do anything differently for this rotation! My preceptor and I worked very well together today. She had me go and do things on my own and I helped whoever if I was needed. Overall, I felt today's experience had been my best rotation yet.

4. What is your major "take home" from today's clinical experience(s)?
 - Teamwork is HUGE not only in healthcare in general, but definitely for emergency room teams. The ER today worked so smooth with the doctors, nurses, EMTs, police officers, and more. I learned never to be afraid of asking for help because generally 5 people will walk into a room to help you.

5. Is there anything else you would like to mention?
 - No 😊
