

N431 Adult Health II

Clinical Reflection Form

Name: Kerrigan Shafer

Date: 09/19/2022

Clinical Rotation Site: Nephrology

1. Briefly write about today's experience(s)
 - a. Today I was unable to experience much of anything. There were no appointments for injections so I watched the nurse make phone calls, referrals and write notes in patient's charts.

2. What is one thing you learned?
 - a. Today I learned what a nurse does behind the scenes in a clinic and how different the job is compared to a floor nurse. It is much more laid back and less demanding.

3. What is one thing you would do differently?
 - a. I would not do anything differently just because I was unable to really experience anything hands on.

4. What is your major "take home" from today's clinical experience(s)?
 - a. My major take away from today is that I have an interest in being a nurse on the floor before I would become a clinic nurse. I like to interact with patients. I may resort to this kind of nursing but not until I work the floor.

5. Is there anything else you would like to mention?
 - a. There is nothing else I would like to mention about my day other than the nurse was very welcoming and walked me through what her day looked like and what her job role is.
