

N431 Adult Health II

Clinical Reflection Form

Name: Abbie Morman

Date: 11-16-22

Clinical Rotation Site: OSF

1. Briefly write about today's experience(s)

Today, I was in the ICU. I assisted with bathing and giving medications. There were multiple patients on ventilators and I assisted with their care.

2. What is one thing you learned?

I became more familiar with ventilators and the sedation that is used. I was able to watch a patient come off sedation to see if they could tolerate breathing on their own.

3. What is one thing you would do differently?

I would like to be more comfortable with ventilator care.

4. What is your major "take home" from today's clinical experience(s)?

Ensuring patient safety was the major take home from today's clinical experience. It was crucial for these patients to be continuously assessed for safety issues because of their status.

5. Is there anything else you would like to mention?

NA
