

N431 Adult Health II

Clinical Reflection Form

Name: Lauren McClain

Date: 11/7/22

Clinical Rotation Site: Cancer Center

1. Briefly write about today's experience(s)

At the cancer center, I mainly shadowed and followed a few different nurses around. I was able to access a port, administer some pre-chemo meds, and watch how chemo was administered. Most of the time was spent sitting and checking up on the patients as they received the chemo. I enjoyed my time at the cancer center.

2. What is one thing you learned?

I learned how to access a port and the importance of the pre-chemo meds.

3. What is one thing you would do differently?

Nothing that I could think of, I asked questions & observed to learn.

4. What is your major "take home" from today's clinical experience(s)?

How important a support system and friendly nurses are while patients are receiving chemo to keep spirits up!

5. Is there anything else you would like to mention?

N/A
