

N321 Adult Health I

Clinical Reflection Form

Name: Tasnim Mustafiz

Date: 12/04/2022

End of clinical Journal

1. Briefly write about your experience(s)

- I had a great experience during clinical this semester. I have got to practice many of last semester's skills and new skills I have learned this semester. I feel much more comfortable on the floor, especially in the ED. I have learned how different situations come to the ED and how things can happen quickly.

2. What are things you learned?

- Some things I have learned this semester were IV Cather, EKG in ER, and I got to practice intramuscular and subcutaneous injections.

3. What are things you would do differently?

- I have learned a lot from the mistakes I have made in my care plan and concept map, so if I had to do something differently, I would redo those.

4. What is your major "take home" from clinical experience(s)?

- One of the major "take home" from the clinical experience was learning techniques on how to start an IV. I feel like I have improved and I am more confident about starting an IV now.

5. Is there anything else you would like to mention?

- No.
