Background

Therapeutic communication is a fundamental component of nursing and is a complex concept. Ensuring positive encounters between nurses and patients is essential for improving the quality of nursing interactions, the performance of various nursing duties, and meeting patients' diverse needs (Abdolrahimi et al., 2017).

This assignment will help students feel comfortable initiating conversations with older adults and raising awareness of older persons' wishes, expectations, resources, cultural traditions, and strengths.

Additional Guidelines:

- Plagiarism will result in a zero on the assignment.
- Follow the directions within each graded section.
- A template for the interview process is provided below.
- All assignments must be completed in Microsoft Word.
- PDF and other formats will not be accepted.
- Follow Grammarly settings per the syllabus for clarity and mechanics.
- Review syllabus for late work policy.

Step One: Interview process:

Step One: Directions: Each student will independently complete the Therapeutic Communication Gerontology Assignment. Students will select an older adult to interview. The interviewee may be a family member, and the interviewee does not have to be a patient. Interviews can be face-to-face, virtual, or by phone. Each interview should be a minimum of 20 minutes. Students should ask a minimum of FIVE question. Example questions are listed below. Students can phrase the questions in a conversational tone. A student may ask a question not listed below but must write down additional questions in interview process chart provided. Students are to complete the Interview Process Chart per chart directions.

Example Interview questions:

1. What are the most rewarding things about getting older? Is it a lifetime of knowledge?
2. What are the most important lessons you have learned in your life? Ask to hear the stories behind those lessons.
3. Who has influenced you the most?
4. What life advice would you pass to future generations?

5. If you could go back to any age, what would it be? Would they stay the age they are now or go back? How far back? What was life like at that time?
6. What do you remember about the place you grew up? Do they still live there, or have they visited? If so, how has it changed?
7. Which invention from your lifetime that amazed you? What was life like before?
8. What was your favorite movie when you were younger?
9. What was your first job? How about your favorite?

Interview Process Chart

Question and Question Number: <ul style="list-style-type: none"> • List the question you asked below 	Student communication: <ul style="list-style-type: none"> • List 1 verbal communication skill used • List 1 non-verbal communication skill used. 	Interviewee communication: <ul style="list-style-type: none"> • List 1 verbal communication skill the patient used • List 1 non-verbal communication skill the interviewee used 	Student thoughts & feelings related to the communication <ul style="list-style-type: none"> • Describe 1 thought or feeling related to the communication
1. What are the most rewarding things about getting older?	Verbal: Asking an open-ended question Non-verbal: Body language	Verbal: Open-mindedness Non-verbal: Eye contact	My grandmother told me the most rewarding thing about getting older is seeing how successful her children are. When asking this question my grandmother was very open with her answer and took pride in what she said about her children.
2. What are the most important lessons you have learned in your life?	Verbal: Active listening Non-verbal: Eye contact	Verbal: Transparency Non-verbal: Eye contact	The most important lesson my grandmother learned in life was that everyone is entitled to their own opinion and should be accepted for who they are. Someone shouldn't have to change to please other people. When my grandmother was trying to answer this at first, she told me that she didn't know how to word it but was trying to be fully transparent with her answer because she didn't want her answer to come off in a political/negative way.
3. Who has influenced	Verbal: Active listening/ asked for clarification	Verbal: Transparency	The person who influenced my grandmother the most is her husband, my grandfather. When I asked her to clarify and

<p>you the most?</p>	<p>Non-verbal: Eye contact</p>	<p>Non-verbal: Eye contact</p>	<p>give some context, she simply told me that he has always been her rock and has influenced her happiness for her and their family. My grandparents are high school sweethearts, so this answer didn't surprise me. I am very close to my grandparents, and I want to have a long and happy marriage like theirs one day.</p>
<p>4. If you could go back to any age, what would it be? Would they stay the age they are now or go back? How far back? What was life like at that time?</p>	<p>Verbal: Active listening Non-verbal: Body language</p>	<p>Verbal: Speaking clearly and concisely Non-verbal: Body language</p>	<p>If my grandmother could go back to any age, she would go back to the ages of 40 -45. She said 40-45 because life then was simpler at the time and not as stressful. She didn't have to worry like she does now with how the world is. When asked this question my grandmother was very clear and knew exactly what age she would go back to. She didn't think twice about her answer.</p>
<p>5. Which invention from your lifetime that amazed you? What was life like before?</p>	<p>Verbal: Active listening Non-verbal: Body language</p>	<p>Verbal: Humor Non-verbal: Body language</p>	<p>The one invention from this lifetime that amazed my grandmother was cellphones. Growing up they weren't around, but at times it made life simpler. Now, she's not sure she could go back to not having one. Having four children and eight grandchildren, she can communicate with all. It is quicker and more efficient when she wants to talk to someone.</p>

Step Two: Interview Evaluation-Reflective Activity

Step Two Directions: After interviewing an older adult, students are to complete a self-reflective evaluation. Answer all FOUR questions listed below. Complete in full sentences with proper clarity and mechanics. Follow rubric for full guidelines.

1. What are the major take-home lessons after interviewing an older adult?
 - a. The biggest take-home lesson is that you should always be kind and show empathy. You never know what someone has been through, so be a good listener. Talking with an older adult can be challenging for some, but it can truly be rewarding sitting down and having an honest, light-hearted conversation.
2. How can a nurse adapt their practice to be more responsive to the unique needs of an older adult client?
 - a. A nurse needs to have an open and positive mind. You may not always have the same beliefs and opinions, but you need to be that one person they can count on and put aside any differences. Having good knowledge of the aging adult can help maintain their quality of life and aid in any conversations and interactions with an older adult.
3. In what way is a student building their nursing skills by interviewing patients including older adults?
 - a. A student can become more comfortable around an older adult. Practicing can also make them feel more secure and confident when asking questions. Becoming confident in any communication skills will make the interaction easier.
4. Reflect on one question and expand on how the communication could improve.
 - a. For question number 2, I was not expecting the answer that I got. I'm not sure what answer I was expecting, but I didn't think it would be hard to answer or word what my grandmother said. I'm not sure why it would have been hard to answer. I could have asked for more clarification but didn't know if I should push it farther based off her body language and tone of voice. I think being able to read the room and person can really help you in determining if you should press a topic more or realize someone doesn't want to elaborate.
