### Topics To Review

### Outcomes

| Nursing Process                                    | No of Points | Individual Score | Description   |
|--|--------------|------------------|---|
| RN Assessment                                      | 1            | 100.0%           | The assessment step of the nursing process involves application of nursing knowledge to the collection, organization, validation and documentation of data about a client's health status. The nurse focuses on the client's response to a specific health problem including the client's health beliefs and practices. The nurse thinks critically to perform a comprehensive assessment of subjective and objective information. Nurses must have excellent communication and assessment skills in order to plan client care. |
| RN Analysis/Diagnosis                              | 2            | 100.0%           | The analysis step of the nursing process involves the nurse's ability to analyze assessment data to identify health problems/risks and a client's needs for health intervention. The nurse identifies patterns or trends, compares the data with expected standards or reference ranges and draws conclusions to direct nursing care. The nurse then frames nursing diagnoses in order to direct client care.   |
| RN Implementation/Therapeutic Nursing Intervention | 2            | 100.0%           | The implementation step of the nursing process involves the nurse's ability to apply nursing knowledge to implement interventions to assist a client to promote, maintain, or restore his health. The nurse uses problem-solving skills, clinical judgment, and critical thinking when using interpersonal and technical skills to provide client care. During this step the nurse will also delegate and supervise care and document the care and the client's response.   |

| <b>Priority Setting</b> | <b>No of Points</b> | <b>Individual Score</b> | <b>Description</b>   |
|-------------------------|---------------------|-------------------------|--|
|                         | 1                   | 100.0%                  | Ability to demonstrate nursing judgment in making decisions about priority responses to a client problem. Also includes establishing priorities regarding the sequence of care to be provided to multiple clients. |

| <b>Thinking Skills</b> | <b>No of Points</b> | <b>Individual Score</b> | <b>Description</b>   |
|------------------------|---------------------|-------------------------|--|
| Clinical Application   | 5                   | 100.0%                  | The ability to apply nursing knowledge to a clinical situation. Incorporates Blooms Taxonomy category of Applying. |

| <b>NCLEX®</b>               | <b>No of Points</b> | <b>Individual Score</b> | <b>Description</b>  |
|-----------------------------|---------------------|-------------------------|---|
| RN Physiological Adaptation | 5                   | 100.0%                  | The nurse manages and provides nursing care for clients with an acute, chronic or life threatening illness. |

| <b>Clinical Areas</b>  | <b>No of Points</b> | <b>Individual Score</b> | <b>Description</b>   |
|------------------------|---------------------|-------------------------|--|
| Adult Medical-Surgical | 5                   | 100.0%                  | Ability to apply medical-surgical nursing knowledge to clinical problems experienced by adults. Topics include care of clients with cardiovascular, hematologic, gastrointestinal, neurosensory, endocrine, fluid and electrolyte, integumentary, lymph/immune/infectious, renal and urinary, musculoskeletal, reproductive, and respiratory disorders as well as topics relevant to perioperative nursing care and emergency care/triage. |

| <b>QSEN</b>             | <b>No of Points</b> | <b>Individual Score</b> | <b>Description</b>   |
|-------------------------|---------------------|-------------------------|--|
| Evidence Based Practice | 5                   | 100.0%                  | The use of current knowledge from research and other credible sources to make clinical judgments and provide client-centered care. |

| <b>NLN Competency</b> | <b>No of Points</b> | <b>Individual Score</b> | <b>Description</b>  |
|-----------------------|---------------------|-------------------------|---|
| Nursing Judgment      | 5                   | 100.0%                  | Nursing judgment involves the use of critical thinking and decision making skills when making clinical judgments that promote safe, quality patient care. |

| <b>BSN Essentials</b>                   | <b>No of Points</b> | <b>Individual Score</b> | <b>Description</b>   |
|---|---------------------|-------------------------|--|
| Scholarship for Evidence-Based Practice | 5                   | 100.0%                  | The need for nurses to be able to understand the research process and base practice and clinical judgments upon fact-based evidence to enhance patient outcomes. |
