

Safety Risk	Potential Harm	Prioritization	Responsible Party (Delegation)	Reporting Required (Interprofessional Collaboration)
Open syringe/ used on bed side table	Stick possibility/ spread of blood borne pathogens dangerous to personnel and patient	2	RN	Charge/ supervisor/ Rn
Open cup of meds on bed side table	Meds could be taken by someone else also the patient hasn't gotten he meds that they needed	3	RN	Charge/ supervisor/ Rn
Canula not in nose	Not receiving the full amount of oxygen prescribed	7	RN/ care partner/ family/ patient	Charge/ supervisor/ Rn
Bed high	Fall hazard	9	RN/ care partner/ patient/family	Charge/ supervisor/ Rn
No rails up on bed	Patient could roll out of bed	8	RN/ care partner/ patient/ family	Charge/ supervisor/ Rn
Foley not interested	Patients' urine is not being eliminated		RN/ care partner	Charge/ supervisor/ Rn
IV fluids not hooked up to IV and in bed	Patient not receiving the prescribed fluids	6	RN	Charge/ supervisor/ Rn
Used needle on bed side table from IV insertion	Pathogen hazard not a stick because the safety was on the needle.	1	RN	Charge/ supervisor/ Rn
Suction tube wrapped around neck	Choking hazard for patients	5	RN/ care partner	Charge/ supervisor/ Rn
Tracheostomy not secured	Patients' airway not secured	4	RN/ care partner/ patient	Charge/ supervisor/ Rn

Foley not hanging bed side rail	Not safe for patient and could have the Foley pulled out	10	RN/ care partner	Charge/ supervisor/ Rn

(Grading Criteria)

Points	If...
5	The student found all 10 actual safety risks in addition to identifying potential safety risks in the client environment.
4	The student found all 10 actual safety risks but did not identify any potential safety risks in the client environment.
3	The student found 7-9 actual safety risks and/or potential safety risks in the client environment.
2	The student found 4-6 actual safety risks and/or potential safety risks in the client environment.
1	The student found 1-3 actual safety risks and/or potential safety risks in the client environment.
0	The student did not find any safety risks in the client environment.
