

N431 Adult Health II

Clinical Reflection Form

Name: Lindsey Burnett

Date: 2/20/23

Clinical Rotation Site: Carle Foundation Hospital-Radiology

1. Briefly write about today's experience(s)

Today's experience went really well, I learned how the MRIs work as well as sedations. I was able to give meds, and take vitals. I learned how to calm children after they wake up from there MRI if they were sedated. I was able to get a successful IV, and learn new tricks on getting a successful IV.

2. What is one thing you learned?

I learned new tips and tricks on how to get a successful IV.

3. What is one thing you would do differently?

Ask more questions, I wasn't really sure how the department worked, and I wasn't prepared with questions like I usually am.

4. What is your major "take home" from today's clinical experience(s)?

Never be afraid to ask questions, when in doubt make sure to ask a coworker for help or verifying something I am unsure of.

5. Is there anything else you would like to mention? I really enjoyed this rotation site and learned a lot while I was there.
