

Suicide Risk Screening Tool

Ask Suicide-Screening Questions

Ask the patient:

- 1. In the past few weeks, have you wished you were dead? Yes No
- 2. In the past few weeks, have you felt that you or your family would be better off if you were dead? Yes No
- 3. In the past week, have you been having thoughts about killing yourself? Yes No
- 4. Have you ever tried to kill yourself? Yes No

If yes, how? 2023- OD 163 pills, 2018- tried to hang self in room,
2019- Strangle self w/ shoe lace Xmas Eve, 2020- OD + cut self (arms),
2021- OD + cut self (neck), 2022- cut self (neck) (razor blades),
 When? February 13th, 2023, 2018, 2019, 2020, 2021, 2022.
 ↓ ↓ ↓ ↓ ↓
 15 yr old 11 yr old 12 yr old 13 yr old 14 yr old 15 yr old

If the patient answers Yes to any of the above, ask the following acuity question:

- 5. Are you having thoughts of killing yourself right now? Yes No

If yes, please describe: _____

Next steps:

- If patient answers "No" to all questions 1 through 4, screening is complete (not necessary to ask question #5). No intervention is necessary (*Note: Clinical judgment can always override a negative screen).
- If patient answers "Yes" to any of questions 1 through 4, or refuses to answer, they are considered a positive screen. Ask question #5 to assess acuity:
 - "Yes" to question #5 = acute positive screen (imminent risk identified)
 - Patient requires a STAT safety/full mental health evaluation. Patient cannot leave until evaluated for safety.
 - Keep patient in sight. Remove all dangerous objects from room. Alert physician or clinician responsible for patient's care.
 - "No" to question #5 = non-acute positive screen (potential risk identified)
 - Patient requires a brief suicide safety assessment to determine if a full mental health evaluation is needed. Patient cannot leave until evaluated for safety.
 - Alert physician or clinician responsible for patient's care.
