

Nicholas Pontes

For our group's Legacy project, we volunteered with HOPE of East Central Illinois - a domestic violence support group based here in Charleston. Our group attended on two separate dates. On the first day, we assisted at a playground near HOPE's housing, and we worked as a team to spread previously-donated pallets of mulch evenly throughout the playground. On the second day, our group assisted with transportation and organization of a substantial quantity of resources made available to the residents located at HOPE. Through efficient teamwork and communication, our group did in hours what would have taken workers at HOPE days to complete, and they were incredibly grateful to have us.
