

HOPE of east central Illinois is an emergency shelter providing transitional housing for survivors of domestic violence. We could not meet the residents due to confidentiality and to ensure their safety. Still, while volunteering, we relieved much stress from the workers, continuously providing security to domestic violence survivors. On February 28, our legacy group went to one of HOPE's transitional housing and laid mulch on the playground used by many children. On March 7, we helped move around donated supplies, including food, kitchen, office, bedroom, and bathroom supplies. We organized all of the supplies to ensure that it was accessible to the residents at HOPE.
