

1. How does the clinical site relate to Population/Global Health?

This clinical site helps all diversity and those who experience poverty. They provide a grocery store and thrift shop. The prices are low and affordable. The store is located within walking distance of most employees, volunteers, and shoppers. They also work closely with local schools and the disabled.

2. How were you an engaged nursing professional today?

Today I interacted with staff and volunteers to run things in the warehouse. I also was able to learn a lot about what their organization consists of.

3. How did you contribute to the service of the community today?

Today I helped sort through donations and hang clothing.

4. Name 3 ways this clinical site impacts the community health?

Welcomes all those of all diversity.

Helps those who are in poverty, low income or need a place to start getting back out into the community such as service obligations.

There is also a computer lab available for the community to use.

5. Name 1 way this site could better serve the community and why?

The site could benefit from a child daycare center. They have been trying to get it up and running for the community but have not been able due to multiple legal situations.

6. What health risks are experienced by the population served by today's clinical site?

There are many but the main health risk is poverty and lack of access to resources.

7. Did this project change you or your thinking and how it changed you?

I believe that this project did change me based on the location my group used. This opened my eyes to see that I am very grateful for what I have and the opportunities I have. There are a lot of people that are out there just trying to survive and live day by day. Those who do not live in poverty do not think about it unless you are actually put in their situation or volunteering to help the community. I actually went and donated my clothing and goods to Salt & Light on my own time because they are non profit and caring for those who are in need.
