

N431 Adult Health II

Clinical Reflection Form

Name: Lindsey Burnett

Date: 4/3/23

Clinical Rotation Site: OR

1. Briefly write about today's experience(s): I got to see a C-section where they went in and cleaned out the incision site, and I got to see what all is done prior to that with the patient and getting them ready for the operating room. I got to see an appendix get taken out and assist with putting in a foley catheter.
2. What is one thing you learned? That it is very important to make sure you are always watching and listening to what is being said to be attentive to things the surgeon may need or anyone else in the room needs.
3. What is one thing you would do differently? I asked a lot of questions during this rotation, especially about the specifics of everyone's roles, as it is important to know who is in the room with you and what they are supposed to be doing.
4. What is your major "take-home" from today's clinical experience(s)? To always be attentive in the room to what's going on with your patient and what the surgeon and other healthcare workers may need during the procedure.
5. Is there anything else you would like to mention? Overall, a really great experience to see the nurses responsibilities in the OR.
