

N431 Adult Health II

Clinical Reflection Form

Name: **Shelby Myers**

Date: **04/03/2023**

Clinical Rotation Site: **OR**

1. Briefly write about today's experience(s)
  - a. Today I was able to observe in the OR and the only procedure I was able to see was a total shoulder arthroplasty. I was able to chat with the nurses about their roles in each position and what qualifications they must meet to do their job.
  
2. What is one thing you learned?
  - a. One thing I learned was about the prepping work that goes into a surgery and how long it really takes to get out all the right equipment and anticipate what the doctors will need.
  
3. What is one thing you would do differently?
  - a. One thing that I would do differently would be to ask more questions about the positions as far as scheduling and other things to see if this would be a possible career path for me in the future.
  
4. What is your major "take home" from today's clinical experience(s)?
  - a. My major "take home" from today is that surgical nursing could possibly be a future career path for me and just how much extra schooling and clinical experience goes into becoming a nurse in the operating room.
  
5. Is there anything else you would like to mention?
  - a. The surgical nursing staff was very helpful and willing to teach me about all the things they were able to. I know how difficult it can be to get a student a good view during a procedure because they are the last person who needs a good view of the field.
