

N321 Adult Health I

Clinical Reflection Form

Name: Lillian Ljubojevic

Date: 4/28/23

End of clinical Journal

1. Briefly write about your experience(s)

My experiences from the clinicals were positive. I visited different departments and I Liked working there whenever I was allowed to do so.

2. What are things you learned? I learned many things about medications and therapies given to patients. I also learned that the work organization in the hospital is not perfect.

3. What are things you would do differently?

I would not change anything about clinicals. Clinicals were very well organized.

4. What is your major “take home” from clinical experience(s)?

The major “take home” from clinicals is the real picture of nursing in a hospital environment. It is very hard working when there is shortage of staff.

5. Is there anything else you would like to mention?

No there is nothing else I would like to mention.
