

N431 Adult Health II

Clinical Reflection Form

Name: Davis Coffey

Date: 6/16/2023

Clinical Rotation Site: Emergency Department @ OSF Danville

1. Briefly write about today's experience(s)

I did many things. IV's, EKG's, a bunch of cardiac monitoring, and many urine samples.

2. What is one thing you learned?

EKG lower leg leads can be placed on the lower abdomen.
Also how to practice IV's.

3. What is one thing you would do differently?

When putting in the IV on an older person with, make sure the skin is very pulled tight.

4. What is your major "take home" from today's clinical experience(s)?

Putting in IV's takes practice. Also, many elderly patients at nursing homes will eventually get UTI's due to incontinence.

5. Is there anything else you would like to mention?

Nope.
