

N431 Adult Health II

Clinical Reflection Form

Name: Elexus Williams

Date: 6/17/2023

Clinical Rotation Site: Emergency Department

1. Briefly write about today's experience(s)

Today, we had a 4-year-old that came into the emergency department that had hypoglycemia and had dehydration, which resulted in him being airlifted to Carle. A classmate and I also had a guy come in with chest pain and I did an EKG on him. We also had a lady with a nosebleed that we helped discharge and get into her daughters' car.

2. What is one thing you learned?

I learned how to enter the information in the EKG. I also learned an easier method to remembering where to place the leads on a 12-lead EKG.

3. What is one thing you would do differently?

One thing I would of did differently was go into every room I could of to practice more 12-lead EKGs.

4. What is your major "take home" from today's clinical experience(s)?

My major "take home" from today was to be able to multitask many patients at once in high stress situations.

5. Is there anything else you would like to mention?

Nothing.
