Clinic Experience

I attended my clinic day at Carle at the Riverfront in Danville, IL. While at the clinic, I observed my nurse making multiple first prenatal visit calls, stocking rooms, escorting clients, and cleaning rooms. My nurse was very informative and helpful. She was very willing and eager to show me different things found in an outpatient clinic. I enjoyed the setting and would enjoy working in an OBGYN outpatient clinic. During my clinical, I saw different birth control placements, the removal and replacement of an IUD, a non-stress test performed, and neonatal assessments. My nurse showed me different pessaries, birth control options, and the procedure room used for various procedures that can be performed in the office. I saw a GBS swab and the different samples that were sent to the lab. I really enjoyed my time at the clinic and am grateful for the opportunity to visit this clinic.
