

N431 Adult Health II

Clinical Reflection Form

Name: Amanda Welker

Date: 09/18/2023

Clinical Rotation Site: Carle- PACU

1. Briefly write about today's experience(s)

Rob was a great preceptor. He explained everything very well regarding the RN duties on the unit. He made sure that he told me everything being done with the patient and the rationale behind it.

2. What is one thing you learned?

One thing I learned was to not overreact over a low BP. Instead, analyze the situation, investigate why, figure out whom to call and how to treat, and implement to give the patient the best care possible.

3. What is one thing you would do differently?

Nothing!

4. What is your major "take home" from today's clinical experience(s)?

PACU is a very diverse unit regarding the type of surgeries and patients received. I realized that it is almost like beside without fully being bedside nursing. PACU would be somewhere I could see myself gaining experience.

5. Is there anything else you would like to mention?

I was amazed at how the PACU team works so well together.
