

N431 Adult Health II

Clinical Reflection Form

Name: Chiquita Baker

Date: Oct, 2, 2023

Clinical Rotation Site:

1. Briefly write about today's experience(s)

Today I got to watch a biopsy, they went in under L4 in the spine and took fluid from an abscess so they could culture it and see if the patient had anything going on like a possible infection.

2. What is one thing you learned?

I got to watch the stat nurse start an IV using a sonogram.

3. What is one thing you would do differently?

There is nothing that I would do differently.

4. What is your major "take home" from today's clinical experience(s)?

There wasn't much to do in radiology today, it was pretty slow and boring so I don't think I would work in that unit.

5. Is there anything else you would like to mention?

No
