

N431 Adult Health II

Clinical Reflection Form

Name: *Kaitlyn L*

Date: *10/2/23*

Clinical Rotation Site:

1. Briefly write about today's experience(s)

*Today I got to see 4 procedures. 3 Lung biopsys and 1 bone marrow biopsy. 2 were right lung biopsys and the other was the left lung.*

2. What is one thing you learned?

*I learned that biopsys are usually pretty quick. Each biopsy was about 30-45 mins.*

3. What is one thing you would do differently?

*I would have asked more questions about the procedure.*

4. What is your major "take home" from today's clinical experience(s)?

*My major take home from today is that most patients freak themselves out about the procedure and think of the worst possible outcome.*

5. Is there anything else you would like to mention?

*I really enjoyed radiology. My nurse was amazing. She went to Lakewood.*
