

N321 Adult Health I

Clinical Reflection Form

Name: Jessica Tillman

Date: 10/10/2023

Mid Term Journal

1. Discuss how you are feeling so far in clinical?

I feel like I have not had the chance to learn a lot about passing medications and nursing duties because of the assignments so now that the bulk of those are completed, I feel like I will be able to focus on learning directly from my nurse and hands on experience. I am excited for morning clinicals being busier.

2. What have been good experiences?

I absolutely loved PACU and watching spinal surgery performed! I enjoyed learning what they do daily in the cancer center and on the med surg unit.

3. Have there been any bad experiences? Could be you nervous about a skill or communication?

No I have not had any bad experiences yet and I am nervous about distributing medications specifically injections.

4. Do you need to talk with anyone in private to discuss clinical?

No thank you for offering.

5. Is there anything else you would like to mention?

Thank you for being so amazing at explaining everything to us and breaking it down for us to understand. Also thank you for being so great when it came to my care plan and what needed to be corrected.
