

N321 Adult Health I

Clinical Reflection Form

Name: Paige Hennessy

Date: 10/09/2023

Mid Term Journal

1. Discuss how you are feeling so far in clinical?

I have really enjoyed this clinical. I feel like I am having the opportunity to learn more and have potential for more hands on care with patients. I am feeling more comfortable working on the units and learning new things each time we go.

2. What have been good experiences?

I really enjoyed my time in the emergency department. I was able to learn a lot and see a lot of different patients. I also enjoyed my time in the ICU. In the ICU and the emergency department I was able to learn more about intensive care and I was able to watch the nurse remove a picc line, do EKGs, and assist in administering medications.

3. Have there been any bad experiences? Could be you nervous about a skill or communication?

I have not encountered a "bad experience". I have felt like some days I do not have the same opportunities in some departments to get hands on learning but everywhere we go we have the opportunity to learn something. I am unsure of the second questions, but I feel nervous about doing IV insertion, but otherwise I feel excited to learn more and gain more knowledge. I feel as though I have learned better communication.

4. Do you need to talk with anyone in private to discuss clinical?

I don't need to meet with anyone in private to discuss clinical. I feel comfortable in the rotations. I also feel very comfortable talking to Professor Henry about any concerns or questions I may have.

5. Is there anything else you would like to mention?

No, I do not have anything else to mention at this time.
