Simulation		
Scenario	In this virtual simulation, you cared for Lea Seko. The goal was to complete a focused respiratory assessment. Review your results below to determine how your performance aligned with the goals of this simulation.	
Overall Performance	You did not meet the requirements to complete this virtual health assessment scenario. Remediation is recommended before attempting this scenario again.	Score: 71.3%
Essential Actions	Required actions - 14 of 19 correctly selected You did not demonstrate a basic understanding of the required actions to complete a focused health assessment based on this client's health status. You demonstrated an understanding of the following required actions: auscultating the anterior chest, auscultating the posterior chest, communicating with the client to elicit additional information, inspecting the anterior chest. Spend time reviewing: - Inspecting skin of the head and neck - Inspecting skin of the posterior chest - Inspecting skin of the upper extremities - Inspecting symmetry of the posterior chest - When to sanitize hands when completing client care	
	Interactive actions - 2 of 2 performed correctly You demonstrated a thorough understanding of assessment techniques within the focused health assessment based on this client's health status. You demonstrated an understanding of the following assessment techniques: auscultating breath sounds.	

Essential Actions	Expected/unexpected findings - 5 of 9 correctly identified You did not demonstrate a basic understanding of the expected and unexpected findings from the focused health assessment based on this client's health status. You demonstrated an understanding of the expected and unexpected findings of the following: auscultating the anterior chest, auscultating the posterior chest, inspecting the anterior chest. Spend time reviewing the expected and unexpected findings of the following: • Inspecting skin of the head and neck • Inspecting skin of the posterior chest • Inspecting skin of the upper extremities • Inspecting symmetry of the posterior chest
Neutral Actions	Neutral actions - 5 selected Neutral actions do not help or harm the client. • <i>Only</i> questions specifically related to the focused respiratory assessment are necessary. • <i>Only</i> steps specifically related to the focused respiratory assessment are necessary.
Actions of Concern	Order violations - 1 selected Order violations occur when you move through the sequence of body areas in the incorrect order; move through the assessment techniques of inspection, palpation, and auscultation in the incorrect order; fail to place or remove gloves when required; or fail to provide for privacy or safety considerations before initiating or concluding a health assessment scenario.

EHR Chart	
Instructor Review Status	Not Reviewed
Instructor Review	This chart has not been reviewed by the instructor. This report will populate with additional information when the status has changed.
Instructor Feedback	Instructor feedback can be viewed by accessing the link on the on-line version of this report. If your instructor has enabled the Expert EHR Chart, you may view the example in the attached page.

This expert chart is intended to assist in evaluating student performance in documentation for this activity. Only the tabs and tables of the chart that warrant entries are included, and the expert responses for comparing against student responses are indicated with bold text.

Lea Seko (F)
MRN: 2774131
Allergies: Seasonal

DOB: 45 Years old
Height: 66 in
Weight: 150 lb

Attending: Maria Lester MD
Code Status: Full code
Comments: none

Admission

HH 5.0 Minutes after start

Admission Problems

Chief Complaint

Principal Problem - Admission Diagnosis

Exercise-induced asthma

Other Problems/Diagnosis

History of Present Illness/Injury

Location- (Where are the Symptoms located?
Are they local or do they radiate?)

Duration- (When did it start? How long has this
problem existed? Is it getting worse? Changing?)

30 years

Timing- (When does it occur?
Night or day? At work? etc.)

Shortness of breath if forgets to
use inhaler prior to exercise

Quality- (Characteristics such as
constant, sharp, dull, sore)

Severity- (How bothersome is the
problem? Can you sleep, work, etc?)

Describe this illness/injury related to how
and where this problem began.

What makes this problem worse or better?

Cold weather worsens but is still
manageable with inhaler

Signs and Symptoms

Comments

HH 5.0 Minutes after start

Allergies

Seasonal
Date allergy noted:
Stuffy nose, watery eyes.

Reviewed
Allergen added/edited

Home Medication List

Calcium

B12

Albuterol

Is patient taking medication? Taking
Last taken: Yesterday Used yesterday
prior to going for a run.

Family History

Asthma/Allergies

Family members affected:
Pt's Sister "she outgrew it"

Immunization Screen

Tetanus

Influenza

Yes

Pneumococcal

No

Hepatitis B

DPT

Polio (IPV)

Chicken Pox (Varicella)

Measles, Mumps, Rubella (MMR)

Additional immunization, Comments

Plans to get pneumonia vaccine

Respiratory

Resp. Effort/Pattern	Bilaterally even and unlabored
Breath Sound, Comments	Symmetrical movement bilaterally with inspiration and expiration. Lung sounds clear bilaterally. Loud, high-pitched bronchial breath sounds over the trachea. Medium-pitched bronchovesicular sounds over the mainstem bronchi, between the scapulae, and below the clavicles. Soft, breezy, relatively low-pitched vesicular breath sounds over most of the peripheral lung fields.
Cough	
Sputum	
Resp. Interventions	
Intervention, Comments	
Respiratory Airways/Drains	
Airway/Drain, Comments
