Mid Term Journal

1. Discuss how you are feeling so far in clinical?

I feel good in clinical so far. Clinical this time is much more hands-on with passing out meds, starting a drip line, accessing the patient chart, etc.

2. What have been good experiences?

A good experience was twice in the ER when Carson and Kayla were my preceptor. During that time, the preceptors pushed for me to do as much as I could off my clinical skill list. They explain everything they were doing and why.

3. Have there been any bad experiences? Could be you are nervous about a skill or communication?

There has not been any bad experience during clinical.

4. Do you need to talk with anyone in private to discuss clinical?

No

5. Is there anything else you would like to mention?

No
