

Legacy Project E-Portfolio Summary

The Legacy Project is a group project focused on students impacting their surrounding community. For our Legacy Project, the group participated as volunteers at the Special Olympics Family Festival. The group dressed in various character costumes during the festival and interacted with athletes. The group positively impacted the event's atmosphere and gave athletes a fun way to meet some of their favorite characters. This project was very gratifying for the group and provided valuable experience working with the intellectually disabled population.
