

Eporfolio

Good morning

I contributed to the entire legacy project by opening my schedule so we could meet and work on the project. I completed my portion of the literature review days before the due date and had to revise the article to fit into the entire literature review. I couldn't help much with writing information for the slides, but I was able to help with gathering information for the slides. I was able to help with reviewing the slides before turning them in to ensure we didn't forget any information. I also contributed to the Effingham nursery significantly by providing that screws on cabinet doors, and those themselves were screwed incorrectly. I also helped replace batteries in all the nursery toys so children could enjoy using them. I also provided care by cleaning the carpets in both rooms and shampooing one of the other rooms. I also helped with wiping cabinets and other things.
