

N431 Adult Health II

Clinical Reflection Form

Name: Amanda Johnson (Welker)

Date: 10/30/23

Clinical Rotation Site: Carle Radiology

1. Briefly write about today's experience(s)

Today was a great experience. I wasn't aware that Nurses can work in the Radiology department. I didn't know what to expect doing clinicals in that department or how busy it would be. Both nurses that I shadowed were awesome. Dawn really knew her stuff and explained everything thoroughly.

2. What is one thing you learned?

One thing that I learned was how to access and de-access a port. Dawn was very helpful in helping me learn this skill and technique.

3. What is one thing you would do differently?

I wouldn't do anything differently.

4. What is your major "take-home" from today's clinical experience(s)?

The major "take-home" from today's clinical experience is that nurses aren't just defined to the bedside. They can literally work anywhere and everywhere.

5. Is there anything else you would like to mention?

I highly recommend that LCN continue to do a clinical rotation in Radiology at Carle.
