<b>Assessment of Client/Family</b>	<b>Nursing Diagnosis &amp; Goal of</b>	<b>Interventions</b>	<b>Methods/Teaching Tools</b>	<b>Evaluation</b>
------------------------------------	--	----------------------	-------------------------------	-------------------

(5 points)	Teaching (5 points)	(5 points)	(2 points)	(3 points)
<p><b>Level of motivation for learning:</b> Patient is eager and ready to learn.</p> <p><b>Barriers to effective learning:</b> The patient should be focused and alert with no distractions to complete the teaching. The patient didn't show any impairments that would hinder his education plan.</p> <p><b>Health beliefs/values:</b> Patient is Christian but does not practice or go to church. The patient wants to get better and values the life he has and all his accomplishments.</p> <p><b>Psychosocial development:</b> Patient is very accepting and in good spirits. He is in integrity vs despair.</p> <p><b>Cognitive development:</b> The patient seems very well. I didn't notice any impairments with his cognition. His cognition appears to be normal for his age. He is in the formal operational stage.</p>	<p><b>Nursing Diagnosis:</b> Risk for impaired skin integrity related to immobility as evidence by mobility deficits (Phelps, 2020).</p> <p><b>Goal of Teaching:</b> Pt will not exhibit skin breakdown. Altered skin integrity increases the chance of infection, impaired mobility, and decreased function. Some factors to affect this include altered nutritional status, vascular disease, and diabetes (Capriotti, 2020).</p>	<p><b>Intervention 1:</b> Turn patient every 2 hours (Phelps, 2020).</p> <p><b>Intervention 2:</b> Ensure the patient stays dry (Phelps, 2020).</p> <p><b>Intervention 3:</b> Ensure adequate nutrition intake (Phelps, 2020).</p>	<p><b>Method 1:</b> Q&amp;A, offer a time for questions and any concerns to have full understanding.</p> <p><b>Method 2:</b> Hand-out method, print out education on the risk of skin breakdown and potential complications.</p>	<p><b>Discuss how the client/family received the teaching:</b> Understands/acknowledges importance of consistent turning, ensuring the patient stays dry, and having a good diet.</p> <p><b>Identify strengths/weaknesses of the client or family in receiving teaching:</b> <b>Strengths:</b> determined to learn</p> <p><b>Weakness:</b> no family present, could be looked at as a weakness to some</p> <p><b>Suggest modifications to improve teaching plan (what would have improved the plan?):</b> To improve the teaching plan, I would have tried to keep the patient more focused on the task at hand and not get distracted so easily. I would then give extra time at the end if needed if he wanted to continue to talk or ask any more questions.</p>
