

Individual Performance Profile

RN Adult Medical Surgical Online Practice 2019 B for NGN

Individual Name: TIRAE A LITTLES	Individual Score: 34.8%
Student Number: 7204347	Practice Time: 8 min
Institution: Lakeview CON	Focused Review Quiz Result
Program Type: BSN	
Test Date: 11/16/2023	

Individual Performance in the Major Content Areas				Individual Score (% Correct)										
Sub-Scale	# Items	# Points	Individual Score	1	10	20	30	40	50	60	70	80	90	100
Management of Care	6	7	57.1%							▲				
Safety and Infection Control	8	8	37.5%					▲						
Health Promotion and Maintenance	4	4	0.0%	▲										
Psychosocial Integrity	3	3	66.7%										▲	
Basic Care and Comfort	8	9	44.4%						▲					
Pharmacological and Parenteral Therapies	16	16	37.5%					▲						
Reduction of Risk Potential	19	31	35.5%					▲						
Physiological Adaptation	26	63	30.2%					▲						

Topics To Review

- Management of Care (3 items)**
- Client Rights (2 items)**
 - Legal Responsibilities: Recognizing a Client's Right to Refuse Treatment (Active Learning Template: Basic Concept)
 - Pain Management: Advocating for a Client Who Requests Acupuncture(Active Learning Template: Basic Concept)
- Case Management (1 item)**
 - Evaluation of Client Education(Active Learning Template: System Disorder)
- Safety and Infection Control (5 items)**
- Accident/Error/Injury Prevention (2 items)**
 - Arthroplasty: Postoperative Instructions for Preventing Musculoskeletal Complications(Active Learning Template: Therapeutic Procedure)
 - Stroke: Preventing Falls During Ambulation(Active Learning Template: System Disorder)
- Handling Hazardous and Infectious Materials (2 items)**
 - Cancer Treatment Options: Safety Precautions for a Client Who Has a Sealed Radiation Implant(Active Learning Template: Therapeutic Procedure)
 - Cancer Treatment Options: Teaching About Brachytherapy Treatment for Cervical Cancer(Active Learning Template: Therapeutic Procedure)
- Standard Precautions/Transmission-Based Precautions/Surgical Asepsis (1 item)**
 - Infection Control: Precautions for a Client Who Has a Positive Culture for an Infection(Active Learning Template: Basic Concept)

Topics To Review

Health Promotion and Maintenance (4 items)

Aging Process (1 item)

Alzheimer's Disease: Measures for Reducing Agitation in an Older Adult Client(Active Learning Template: Basic Concept)

Health Screening (1 item)

Hypertension: Education Related to High-Risk Groups(Active Learning Template: System Disorder)

Health Promotion/Disease Prevention (2 items)

Health, Wellness, and Illness: Identifying Risk Factors for Atherosclerosis(Active Learning Template: System Disorder)

Osteoporosis: Educating a Client Who Is At Risk(Active Learning Template: System Disorder)

Psychosocial Integrity (1 item)

Support Systems (1 item)

Alzheimer's Disease: Teaching Family About Caring for a Parent Who Has Alzheimer's Disease(Active Learning Template: System Disorder)

Basic Care and Comfort (4 items)

Elimination (1 item)

Identifying Priority Assessment Findings(Active Learning Template: System Disorder)

Non-Pharmacological Comfort Interventions (3 items)

Cancer Disorders: Palliative Care for Dyspnea(Active Learning Template: System Disorder)

Complementary, Alternative, and Integrative Therapies: Teaching a Client About Ginkgo Biloba(Active Learning Template: Medication)

Rheumatoid Arthritis: Pain Management Strategies(Active Learning Template: System Disorder)

Pharmacological and Parenteral Therapies (10 items)

Adverse Effects/Contraindications/Side Effects/Interactions (3 items)

Female Physiologic Processes: Hormone Replacement Therapy Findings to Report(Active Learning Template: Medication)

HIV/AIDS: Adverse Effects of Amphotericin B (Active Learning Template: Medication)

Osteoporosis: Medications That Increase Risk of Development (Active Learning Template: System Disorder)

Blood and Blood Products (2 items)

Blood and Blood Product Transfusions: Identifying Transfusion Reactions(Active Learning Template: Nursing Skill)

Blood and Blood Product Transfusions: Intervening for a Transfusion Reaction(Active Learning Template: Therapeutic Procedure)

Expected Actions/Outcomes (1 item)

Hematologic Diagnostic Procedures: Efficacy of Warfarin Therapy(Active Learning Template: Medication)

Medication Administration (4 items)

Anemias: Teaching About Iron Supplements(Active Learning Template: Medication)

Antibiotics Affecting Protein Synthesis: Adverse Effects of Aminoglycosides(Active Learning Template: Medication)

Gastrointestinal Disorders: Teaching About Psyllium(Active Learning Template: Medication)

Medications Affecting Coagulation: Precautions for Heparin Self-Administration(Active Learning Template: Medication)

Reduction of Risk Potential (12 items)

Potential for Complications from Surgical Procedures and Health Alterations (2 items)

Hemodynamic Shock: Postoperative Monitoring for Hemorrhage(Active Learning Template: System Disorder)

Pituitary Disorders: Expected Findings of Diabetes Insipidus(Active Learning Template: System Disorder)

System Specific Assessments (2 items)

Findings that Require Follow-up for a Client Who Has a Penetrating Wound(Active Learning Template: Basic Concept)

Stroke: Priority Assessment(Active Learning Template: Therapeutic Procedure)

Potential for Complications of Diagnostic Tests/Treatments/Procedures (2 items)

Caring for a Client Who Has a Chest Tube(Active Learning Template: Nursing Skill)

Topics To Review

Evaluating a Client Who Has a Chest Wound(Active Learning Template: Basic Concept)

Laboratory Values (1 item)

Chronic Obstructive Pulmonary Disease: Interpreting ABG Results(Active Learning Template: Diagnostic Procedure)

Therapeutic Procedures (4 items)

Cancer Disorders: Caring for a Client Who Is Postoperative Following a Mastectomy(Active Learning Template: Therapeutic Procedure)

Chest Tube Insertion and Monitoring: Evaluating Effectiveness of Treatment(Active Learning Template: Therapeutic Procedure)

Musculoskeletal Trauma: Findings to Report Following an Open Reduction Internal Fixation(Active Learning Template: Therapeutic Procedure)

Preoperative Teaching for a Client Who Is Scheduled for a Total Knee Arthroplasty(Active Learning Template: Therapeutic Procedure)

Potential for Alterations in Body Systems (1 item)

Peripheral Vascular Diseases: Expected Findings(Active Learning Template: System Disorder)

Physiological Adaptation (23 items)

Alterations in Body Systems (7 items)

Airway Management: Monitoring for Hypoxia During Suctioning(Active Learning Template: Nursing Skill)

Bacterial, Viral, Fungal, and Parasitic Infections: Teaching About Lyme Disease(Active Learning Template: System Disorder)

Hyperthyroidism: Priority Action Following a Parathyroidectomy(Active Learning Template: Therapeutic Procedure)

Postoperative Nursing Care: Managing a Closed-Suction Drain(Active Learning Template: Therapeutic Procedure)

Preparing a Client for an Exploratory Laparotomy (Active Learning Template: System Disorder)

Tuberculosis: Discharge Instructions(Active Learning Template: System Disorder)

Tuberculosis: Family Teaching(Active Learning Template: Basic Concept)

Unexpected Response to Therapies (1 item)

Client Risk During the Emergent Phase of Burn Treatment(Active Learning Template: System Disorder)

Pathophysiology (4 items)

Analysis of Findings(Active Learning Template: System Disorder)

Identifying Assessment Findings Associated With Respiratory Disorders(Active Learning Template: System Disorder)

Identifying Manifestations of a Client Condition(Active Learning Template: System Disorder)

Priority Findings to Report(Active Learning Template: System Disorder)

Medical Emergencies (4 items)

Emergency Nursing Principles and Management: Priority Action During an Anaphylactic Reaction(Active Learning Template: Basic Concept)

Identifying Manifestations of a Hemothorax(Active Learning Template: System Disorder)

Prioritizing Client Care(Active Learning Template: System Disorder)

Respiratory Management and Mechanical Ventilation: Priority Finding to Report Following Extubation(Active Learning Template: Therapeutic Procedure)

Fluid and Electrolyte Imbalances (1 item)

Nursing Interventions For a Client Experiencing a Fluid Imbalance (Active Learning Template: System Disorder)

Hemodynamics (3 items)

Cardiovascular Diagnostic and Therapeutic Procedures: Managing an Arterial Line(Active Learning Template: Diagnostic Procedure)

Hemodialysis and Peritoneal Dialysis: Priority Finding(Active Learning Template: Therapeutic Procedure)

Pacemakers and Implantable Cardioverter/Defibrillators: Rhythm Strip Interpretation(Active Learning Template: System Disorder)

Illness Management (3 items)

Caring for a Client Who Has a Chest Wound(Active Learning Template: Basic Concept)

Topics To Review

Identifying Data to Report to the Client's Provider(Active Learning Template: Therapeutic Procedure)

Planning Care for a Client Who Has Peritonitis(Active Learning Template: System Disorder)

Outcomes

Nursing Process	No of Points	Individual Score	Description
RN Assessment	13	46.2%	The assessment step of the nursing process involves application of nursing knowledge to the collection, organization, validation and documentation of data about a client's health status. The nurse focuses on the client's response to a specific health problem including the client's health beliefs and practices. The nurse thinks critically to perform a comprehensive assessment of subjective and objective information. Nurses must have excellent communication and assessment skills in order to plan client care.
RN Analysis/Diagnosis	44	31.8%	The analysis step of the nursing process involves the nurse's ability to analyze assessment data to identify health problems/risks and a client's needs for health intervention. The nurse identifies patterns or trends, compares the data with expected standards or reference ranges and draws conclusions to direct nursing care. The nurse then frames nursing diagnoses in order to direct client care.
RN Planning	23	39.1%	The planning step of the nursing process involves the nurse's ability to make decisions and problem solve. The nurse uses a client's assessment data and nursing diagnoses to develop measurable client goals/outcomes and identify nursing interventions. The nurse uses evidenced based practice to set client goals, establish priorities of care, and identify nursing interventions to assist the client to achieve his goals.
RN Implementation/Therapeutic Nursing Intervention	33	30.3%	The implementation step of the nursing process involves the nurse's ability to apply nursing knowledge to implement interventions to assist a client to promote, maintain, or restore his health. The nurse uses problem-solving skills, clinical judgment, and critical thinking when using interpersonal and technical skills to provide client care. During this step the nurse will also delegate and supervise care and document the care and the client's response.
RN Evaluation	28	35.7%	The evaluation step of the nursing process involves the nurse's ability to evaluate a client's response to nursing interventions and to reach a nursing judgment regarding the extent to which the client has met the goals and outcomes. During this step the nurse will also assess client/staff understanding of instruction, the effectiveness of interventions, and identify the need for further intervention or the need to alter the plan.
Priority Setting	No of Points	Individual Score	Description
	15	33.3%	Ability to demonstrate nursing judgment in making decisions about priority responses to a client problem. Also includes establishing priorities regarding the sequence of care to be provided to multiple clients.

Thinking Skills	No of Points	Individual Score	Description
Foundational Thinking	10	50.0%	The ability to comprehend information and concepts. Incorporates Blooms Taxonomy categories of Remembering and Understanding.
Clinical Application	62	37.1%	The ability to apply nursing knowledge to a clinical situation. Incorporates Blooms Taxonomy category of Applying.
Clinical Judgment	69	30.4%	The ability to analyze and interpret elements of a clinical situation to make a decision and respond appropriately. Incorporates Blooms Taxonomy categories of Analyzing and Evaluating.

NCLEX®	No of Points	Individual Score	Description
RN Management of Care	7	57.1%	The nurse coordinates, supervises and/or collaborates with members of the health care to provide an environment that is cost-effective and safe for clients.
RN Safety and Infection Control	8	37.5%	The nurse uses preventive safety measures to promote the health and well-being of clients, significant others, and members of the health care team.
RN Health Promotion and Maintenance	4	0.0%	The nurse directs nursing care to promote prevention and detection of illness and support optimal health.
RN Psychosocial Integrity	3	66.7%	The nurse directs nursing care to promote and support the emotional, mental and social well-being of clients and significant others.
RN Basic Care and Comfort	9	44.4%	The nurse provides nursing care to promote comfort and assist client to perform activities of daily living.
RN Pharmacological and Parenteral Therapies	16	37.5%	The nurse administers, monitors and evaluates pharmacological and parenteral therapy.
RN Reduction of Risk Potential	31	35.5%	The nurse directs nursing care to decrease clients' risk of developing complications from existing health disorders, treatments or procedures.
RN Physiological Adaptation	63	30.2%	The nurse manages and provides nursing care for clients with an acute, chronic or life threatening illness.

QSEN	No of Points	Individual Score	Description
Safety	38	39.5%	The minimization of risk factors that could cause injury or harm while promoting quality care and maintaining a secure environment for clients, self, and others.
Patient-Centered Care	19	31.6%	The provision of caring and compassionate, culturally sensitive care that is based on a patient's physiological, psychological, sociological, spiritual, and cultural needs, preferences, and values.
Evidence Based Practice	83	32.5%	The use of current knowledge from research and other credible sources to make clinical judgments and provide client-centered care.
Teamwork and Collaboration	1	100.0%	The delivery of client care in partnership with multidisciplinary members of the health care team, to achieve continuity of care and positive client outcomes.

NLN Competency	No of Points	Individual Score	Description
Human Flourishing	12	33.3%	Human flourishing is reflected in patient care that demonstrates respect for diversity, approaches patients in a holistic and patient-centered manner, and uses advocacy to enhance their health and well-being.
Nursing Judgment	108	35.2%	Nursing judgment involves the use of critical thinking and decision making skills when making clinical judgments that promote safe, quality patient care.
Professional Identity	1	100.0%	Professional identity reflects the professional development of the nurse as a member and leader of the health care team who promotes relationship-centered care, and whose practice reflects integrity and caring while following ethical and legal guidelines.
Spirit of Inquiry	20	30.0%	A spirit of inquiry is exhibited by nurses who provide evidence based clinical nursing practice and use evidence to promote change and excellence.

BSN Essentials	No of Points	Individual Score	Description
Liberal Education for Baccalaureate Generalist Nursing Practice	21	42.9%	The need for an education that exposes nurses to multiple fields of study providing the foundation for a global perspective of society as well as high level thinking and acquisition of skills that can be applied to complex patient and system-based problems.
Basic Organization and Systems Leadership for Quality Care and Patient Safety	6	33.3%	The need for nurses to be able to understand power relationships and use decision-making and leadership skills to promote safe practice and quality improvement within health care systems.
Scholarship for Evidence-Based Practice	78	33.3%	The need for nurses to be able to understand the research process and base practice and clinical judgments upon fact-based evidence to enhance patient outcomes.
Interprofessional Communication and Collaboration	1	100.0%	The need for nurses to be able to function as a member of the healthcare team while promoting an environment that supports interprofessional communication and collaboration with the goal of providing patient-centered care.
Clinical Prevention and Population Health	22	27.3%	The need for nurses to be able to identify health related risk factors and facilitate behaviors that support health promotion, and disease and injury prevention, while providing population-focused care that is based on principles of epidemiology and promotes social justice.
Baccalaureate Generalist Nursing Practice	13	38.5%	The need for nurses to be able to practice as a generalist using clinical reasoning to provide care to patients across the lifespan and healthcare continuum and to individuals, families, groups, communities, and populations.

Clinical Judgment	No of Points	Individual Score	Description
Recognize Cues	5	40.0%	Filter information from different sources (i.e., signs, symptoms, health history, environment). Identify relevant information related to the client's condition. Use knowledge, experience and evidence to assess clients. Use verbal, nonverbal, written, and electronic modes of communication. Recognize relevant subjective/objective client data. Identify subtle and apparent changes in client condition and related factors.

Analyze Cues	28	25.0%	<p>Link recognized cues to a client's clinical presentation and establishing probable client needs, concerns, or problems. Compare client findings to evidence-based resources and standards of care.</p> <p>Analyze expected and unexpected findings in health data.</p> <p>Anticipate illness/injury and wellness progression.</p> <p>Identify client problems and related health alterations.</p> <p>Analyze client needs.</p> <p>Identify potential complications.</p> <p>Identify how pathophysiology relates to clinical presentation.</p> <p>Identify data that is of immediate concern.</p>
Prioritize Hypotheses	3	33.3%	<p>Establish priorities of care based on the client's health problems (i.e. environmental factors, risk assessment, urgency, signs/ symptoms, diagnostic test, lab values, etc.).</p> <p>Organize client assessment information according to changes, patterns and trends.</p> <p>Use standards of care and empirical frameworks for priority setting.</p> <p>Establish and prioritize client problems/needs based on the analysis of information and factors.</p>
Generate Solutions	9	22.2%	<p>Identify expected outcomes and related nursing interventions to ensure clients' needs are met.</p> <p>Collaborate with members of the interprofessional healthcare team to establish client outcomes and the plan of care.</p> <p>Collaborate with client and care partners to establish client outcomes and the plan of care.</p> <p>Identify optimal client outcomes based on information and factors.</p> <p>Identify evidence-based nursing actions to effectively address the clinical situation of the client's health problem.</p> <p>Prioritize plan of care to achieve optimal client outcomes.</p> <p>Prioritize nursing care when caring for multiple clients.</p> <p>Re-prioritize nursing actions as the client's condition changes.</p> <p>Modify a plan of care to assure achievement of optimal client outcomes when indicated.</p> <p>Determine the potential impact of selected interventions.</p>
Take Actions	8	37.5%	<p>Implement appropriate interventions based on nursing knowledge, priorities of care, and planned outcomes to promote, maintain, or restore a client's health.</p> <p>Promptly and accurately perform nursing actions based on prioritized client problems.</p> <p>Implement a plan of care in collaboration with members of the interprofessional health care team.</p> <p>Implement a plan of care in collaboration with the client and care partners.</p> <p>Accurately document client care data and information.</p> <p>Incorporate client preferences and needs when performing nursing actions.</p> <p>Provide education to the client and/or care partner(s) regarding their health condition and care management.</p> <p>Participate in coordination of care with the client and healthcare team.</p> <p>Monitor the client's response to interventions.</p>
Evaluate Outcomes	16	37.5%	<p>Evaluate a client's response to nursing interventions and reach a nursing judgment regarding the extent to which outcomes have been met.</p> <p>Reassess client condition to determine achievement of expected outcomes.</p> <p>Evaluate efficacy of nursing actions determine if client outcomes were met.</p> <p>Modify client outcomes and/or nursing actions based on the client's response and clinical findings when indicated.</p> <p>Update and revise the plan of care.</p>

Score Explanation and Interpretation

Individual Performance Profile

ITEM SCORING

ATI follows NCSBN guidance for item scoring. Accordingly, each item is worth one or more points. Depending on the item-specific scoring method, a student's response may earn full, partial, or no points.

INDIVIDUAL SCORE

The individual score is the number of points received divided by the number of points on the assessment. It is on a scale of 0% to 100%.

TOPICS TO REVIEW

Based on the questions missed on this assessment, a listing of content areas and topics to review may be provided. A variety of learning resources may be used in the review process, including content, images, animations, and videos in ATI's Content Mastery Series® Review Modules, online practice assessments, and a focused review that is individualized to the questions missed.
