

N321 Adult Health I

Clinical Reflection Form

Name: Ragin Baker

Date: 12/7/23

End of clinical Journal

1. Briefly write about your experience(s)

I had a nice experience at clinical. I learned a bunch of new skills that will help me in my career.

2. What are things you learned?

I have learned how to start and IV, perform head-to-toe assessment, pass medications, and other many skills.

3. What are things you would do differently?

There is nothing that I would have done differently at clinical, I had a good experience.

4. What is your major "take home" from clinical experience(s)?

My biggest take away from clinical was how to start an IV and how to pass and draw up medications. These two skills I will be using the rest of my career.

5. Is there anything else you would like to mention?

I really enjoyed my preceptor, Jenny. She was amazing and it was always a fun day being with her. She taught me so much and let me perform many skills!
